VIVEK NISHAD

COMPUTER SCIENCE | SOFTWARE • AI/DATA • FINTECH

vivekworks51@gmail.com | 7428554431 | LinkedIn | GitHub

Professional Summary

Computer Science student with hands-on experience building and deploying full-stack, backend, and AI-driven applications. Experienced with Python, JavaScript, React, Node.js, FastAPI, Flask, SQL, RAG pipelines, and financial data systems, with internship experience developing production features and integrating APIs and health-data services. Interested in Software Engineering, Backend, AI/Data, and FinTech roles.

Education

B.Sc. Computer Science (Hons.) – Dyal Singh College, University of Delhi *Pursuing | 7.2/10*

AISSCE (Science) – St. Paul's School, New Delhi *2023 | 87.4%*

AISSE – St. Paul's School, New Delhi *2021 | 94.6%*

Experience

Full-Stack Developer Intern *Jan 2026 – Mar 2026*

Fin-i | Certificate

- Developed features for a cross-platform fitness application using **React Native, Node.js and APIs**, implementing fitness and nutrition calculations including BMI, body-fat, calorie and macronutrient requirements.
- Integrated **Google Health Connect** to ingest health and activity data from external sources such as Cronometer, including step-count metrics, and surfaced the data through user-facing application screens.
- Translated client requirements into technical specifications, coordinated with design and development teams, incorporated iterative feedback into sprint releases, and contributed to shipping the product within 3 months.

Research Co-Author *Jun 2025 – Apr 2026*

University of Delhi (with Faculty Supervisor) | Research Paper

- Co-authored research evaluating SEBI-mandated liquidity stress tests in Indian small-cap mutual funds across the 2008 GFC, 2016 Demonetization, and 2020 COVID-19 pandemic.
- Contributed logic design and quantitative coding; analysis identified a 16% contraction in trading volumes during 2008 and better liquidity resilience in smaller funds. Paper submitted to the *Journal of Emerging Market Finance*.

Technical Projects

FilingLens – Agentic RAG over SEC 10-K Filings *Jul 2026* | Live

- Built an agentic RAG system generating structured risk memos from SEC 10-K filings using retrieved evidence, FastAPI, ChromaDB, and Groq LLM.
- Added a fact-checking layer validating management narrative claims against reported financials; deployed a live `/analyze` endpoint for US tickers at ∼15s response time with 22 pytest tests.

Systemic Liquidity Contagion & Fund Herding Engine *Jun 2026* | Live

- Built a Python quantitative pipeline using Amihud Illiquidity, Days-to-Liquidate, and Price Impact models on 90-day live NSE data to measure systemic herding risk.
- Developed stress testing for fund size, redemption shock, and liquidity constraints; cleaned AMFI data using deduplication and fuzzy entity matching.

FoodBridge – Real-Time Food Surplus Marketplace *May 2026* | Live

- Built a Flask/PostgreSQL marketplace connecting restaurants with NGOs, featuring dual-role authentication, in-app chat, GPS-pinned listings, and live countdown timers.
- Engineered split-claiming logic to automatically create a new active listing for unclaimed quantities; deployed with Gunicorn on Render + Vercel.

Leadership

Coordinator, DSC Unit *Sep 2023 – Dec 2023*

Aarambh Organization | Drive Link

- Managed procurement and distribution of resources to underserved communities; organized 7 successful drives across Vasant Kunj, Bhikaji Palace, and Satya Niketan.
- Conducted door-to-door surveys in Ambedkar Colony to document an illegal dump yard blocking road access for 500+ daily commuters; escalated findings to municipal officials and coordinated clean-up, restoring a clear road to the slum community.

President → Joint Secretary → Junior Executive *Aug 2023 – Jun 2026*

E-Cell, Dyal Singh College | LOR

- Led a 120-member organization across content, partnerships, logistics, and entrepreneurship programs; secured 5+ brand sponsorships worth INR 2.3L.
- Redesigned the B-Plan competition, contributing to 5,000+ attendees and enabling 2 startups to raise INR 30K and INR 60K seed grants; drove GTM for a student platform reaching 450+ verified downloads.

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS

Backend & Web: FastAPI, Flask, React, Next.js, Node.js, React Native, Tailwind CSS

AI/Data: RAG, ChromaDB, BM25 Hybrid Retrieval, Pandas, PyTorch

Databases & Cloud: PostgreSQL, SQLite, Vercel, Render, Git/GitHub

Financial Engineering: SEC EDGAR/XBRL, Amihud Illiquidity, Price Impact, DTL Modelling

Awards

Gold Medal – Hackathon & Brain Wave (Techfest), Dyal Singh College, 2024

Silver Medal – Hindi Extempore, Delhi Government Cultural Team (School Level), 2020
